Address: \_\_\_\_\_

Impervious surfaces are any surface that prevents the infiltration of water into the ground. This includes house roofs, driveways, sidewalks, patios, garage roofs, storage sheds, and similar surfaces. Per \_\_\_\_\_ municipal's stormwater management regulations; stormwater management facilities are required whenever more than 2,500 square feet of new impervious surface is proposed. Existing impervious area and redevelopment are not considered "new" impervious surfaces for this calculation.

## Section 2

Complete this Table to Calculate Total Impervious Surface Area
